A NOTE TO EVERYONE READING THIS DOCUMENT

This is not just a technical specification. This document is the founding blueprint of Inside Global Events I.G.E a globally positioned events intelligence and sponsorship marketplace built for Africa, the diaspora, and the world.

Every designer, developer, engineer, strategist, and partner who touches this product must understand the vision at the same level as the founder. IGE is not a startup side project. It is infrastructure. It is the commercial engine the African events industry has been waiting for. Build it that way.

If anything in this document is unclear, ask before you build. A question costs an hour. A wrong assumption costs a sprint.

01. EXECUTIVE SUMMARY

What IGE is, why it matters, and why now.

I.G.E (Inside Global Events) is a vertically integrated event intelligence and sponsorship marketplace platform built for the Africa-Europe corridor and the global events economy. It is not another event listing directory. It is end-to-end commercial infrastructure that connects event organisers with brand sponsors, structures deals with data, and monetises every stage of the sponsorship lifecycle, including empowering a distributed network of partnerships professionals to generate deals and earn commission through the Vouch Links referral engine.

Market Opportunity

The global event sponsorship market is projected to grow significantly through 2033, with the Middle East and Africa emerging as a structurally underserved but high-potential region. African events collectively attract millions of attendees annually across tech, finance, culture, diaspora, and lifestyle verticals, yet the infrastructure to match them with sponsors professionally remains fragmented, informal, and inaccessible to global brands.

IGE captures the white space between the informal Nigerian/African event economy and the sophisticated, data-driven sponsorship tools available to Western markets. The platform creates a structured, commercially credible, and globally discoverable marketplace where:

- Event organisers across Africa, Europe, and diaspora markets can list, structure, and sell sponsorship professionally.
- Brands from Nigerian fintechs to European FMCGs entering Africa can discover, evaluate, and commit to event partnerships with confidence.
- Partnerships professionals, brand marketers, and connectors with access to sponsor budgets can actively refer deals through the platform and earn commission, powered by the Vouch Links referral engine.
- ABW earns revenue at every stage: listing fees, percentage-based deal commissions, retainer advisory, platform subscriptions, and premium intelligence features.

The Unicorn Opportunity

- No credible, tech-enabled event sponsorship marketplace exists for Africa or the Africa-Europe corridor.
- The founder (Alero Boyo, ABW) has direct execution experience in event partnerships across Nigeria, France, and diaspora markets, giving the platform authentic supply-side credibility from Day 1.

- The business model is multi-sided: organisers pay, sponsors pay, referral partners earn and the platform earns on deal flow, creating four revenue surfaces on a single transaction.
- Documentary production and event intelligence layers create media and data moats that pure directories cannot replicate.
- The Nigeria-France corridor is structurally underserved and growing: diaspora events, trade missions, cultural festivals, and brand activations need exactly this infrastructure.
- The Vouch Links integration creates a distributed salesforce of partnerships professionals who have warm relationships with sponsor budgets, accelerating deal flow without requiring IGE to build a full sales team.

02. PRODUCT VISION & STRATEGIC POSITIONING

The vision. The pillars. How we win.

VISION STATEMENT

"I.G.E is the world's first event intelligence and sponsorship execution platform built for Africa and the global events economy, where organisers find sponsors, sponsors find audiences, professionals earn from every deal they broker, and partnerships close at scale."

Six Strategic Pillars

Pillar 1: Discovery	Brands and sponsors discover vetted events through a searchable, filterable, data-rich marketplace. Events are vetted, structured, and presented with audience intelligence, ROI data, and commercial clarity.
Pillar 2: Intelligence	IGE builds a proprietary data layer on African events, attendance size, audience profiles, sector concentration, sponsor history, ROI benchmarks, and regional reach. This intelligence layer becomes a competitive moat and investor-facing asset.
Pillar 3: Execution	The platform enables sponsors and organisers to transact from intent to contract to payment within the platform. ABW's fractional execution model means IGE is not just software; it is a managed service with human expertise behind every deal.
Pillar 4: Referral Network	Through the Vouch Links integration, IGE activates a distributed network of partnerships professionals, brand marketers, and connectors who refer sponsors to events and earn commission on every deal that closes. This turns the platform's community into a revenue-generating sales engine.

Pillar 5: Media	IGE produces documentary and behind-the-scenes content about African events, creating a media property that drives organic discovery, builds platform authority, and generates licensing and brand partnership revenue.
Pillar 6: Community	Organisers, sponsors, and referral partners participate in a structured community: the IGE Network. Network effects compound: more organisers → more sponsors → more referral partners → more deals → stronger intelligence layer.

Competitive Positioning

Platform	What They Do	Where IGE Wins
Vendelux (US)	B2B event intelligence for GTM teams	IGE serves both sides: organisers and sponsors. Covers most African events Vendelux ignores. Adds deal execution, referral network, and professionals marketplace.
Eventbrite / Ticketing	Attendee ticketing & logistics	IGE operates the sponsorship layer entirely. Different buyer, different value proposition.
African event directories	Basic listing sites, no commercial infrastructure	IGE adds vetting, audience intelligence, structured sponsorship tiers, deal facilitation, and AI matching.
Sponsorship agencies (traditional)	Manual, relationship-based, slow	IGE digitises and scales what agencies do manually. Faster, transparent, globally accessible.
No competitor (Referral Engine)	N/A — no platform has this in Africa	IGE activates partnerships professionals as a distributed deal referral network via Vouch Links integration, a capability no competitor in Africa has built.

03. USER PERSONAS & JOBS-TO-BE-DONE

Who uses IGE and what they need from it.

Platform User Types

User Type	Who They Are	Primary Job-to-Be-Done
Event Organiser	Individual or company running a conference, summit, gala, festival, trade mission, or cultural event in Africa or diaspora markets.	Find and close brand sponsors fast. Get structured support for sponsorship packaging and outreach.
Brand Sponsor	Marketing, partnerships, or brand manager at a corporate, fintech, FMCG, bank, insurance, or consumer brand.	Discover the right events for their audience. Evaluate ROI before committing. Execute partnerships without friction.
Referral Partner	Partnerships professionals, brand marketers, brand managers, account managers, and well-connected individuals with access to sponsor decision-makers and budgets.	Browse the event marketplace, refer brand sponsors to events via trackable Vouch Links referral links, and earn commission when deals close.
ABW / IGE Team	Internal team managing the platform, vetting events, facilitating deals, and generating intelligence.	Manage listings, deal pipelines, commission tracking, referral partner management, and platform quality at scale.
Media / Documentary Partner	Journalists, content producers, or documentary teams interested in event coverage.	Discover events worth covering. Commission or access behind-the-scenes content.
ABW Private Circle & Tribe Member	Mid - Senior partnership leaders and founders in the ABW ecosystem.	Access deal flow, intelligence reports, and exclusive event sponsorship opportunities not available publicly.

Persona: Referral Partner (Vouch Links)

Name	Tunde — Partnerships Consultant & Brand Connector
Background	8 years in brand marketing and partnerships. Has warm relationships with marketing directors at 3 major Nigerian banks, 2 fintechs, and a pan-African FMCG brand. Not employed by any of them, he freelances and consults.
Challenge	He knows which brands have sponsorship budgets but has no structured platform to show them curated event opportunities, and no infrastructure to earn legitimate commission when he facilitates a deal.
Goal	Browse IGE's marketplace, identify events that match his network's sponsorship interests, generate a trackable referral link via Vouch Links, share it with brand contacts, and earn 5–10% commission when the deal closes.
Pain Points	No professional platform to operate from. Deals he brokers informally are often not honoured. No transparency on commission. No tracking or accountability.
How IGE Serves Him	A dedicated Referral Partner account type. LinkedIn authentication. Access to the full event marketplace. One-click Vouch Links referral link generation per event. Real-time tracking of clicks, conversions, and commission status. Clear payout terms and in-platform commission dashboard.

04. VOUCH LINKS REFERRAL ENGINE

How the referral network works. This is a core commercial differentiator.

DEVELOPER NOTE: This is not an optional feature. The Vouch Links referral engine is a core part of IGE's commercial model and go-to-market strategy. It must be built with the same rigour as the core marketplace.

4.1 What This Feature Does

The Vouch Links Referral Engine enables a distributed network of partnerships professionals, brand marketers, and well-connected individuals to actively refer corporate sponsors to events listed on the IGE marketplace and earn commission when deals close.

IGE integrates with Vouch Links (vouchlinks.com) a referral and affiliate infrastructure platform to power the tracking, attribution, and commission management layer. IGE does not build its own referral tracking infrastructure in the MVP; the Vouch Links integration handles it.

This turns IGE's community into a distributed, performance-driven deal generation network reducing IGE's dependence on a large internal sales team while driving deal velocity from Day 1.

4.2 The Referral Flow — Step by Step

Step 1: Sign Up as Referral Partner	Partnerships professionals, brand marketers, and connectors register on IGE with the 'Referral Partner' account type. Profile includes: name, professional background, LinkedIn URL, primary industry/sector expertise, and typical sponsor network (described, not listed privacy protected).
Step 2: Browse the Marketplace	Referral partners access the full IGE event marketplace and filter events by sector, geography, audience profile, and sponsorship budget to identify events their network is likely to sponsor.
Step 3: Generate a Referral Link	For any event they want to refer to, the partner clicks 'Refer This Event' and a unique, trackable referral link is generated via the Vouch Links integration. The link is tied to their partner ID and the specific event.
Step 4: Share with Sponsor Contacts	The partner shares the referral link directly with their brand/sponsor contacts (via WhatsApp, email, LinkedIn, or any channel). The link directs the sponsor to the IGE event listing page with the partner's attribution embedded.

Step 5: Sponsor Engages	The referred sponsor lands on the event page, browses the sponsorship packages, and submits a Commitment / Intent Form. The referral attribution is captured automatically.
Step 6: Deal Facilitation	ABW team and the event organiser manage the deal via the IGE deal pipeline. The referral partner's contribution is logged and visible on the deal card.
Step 7: Commission Earned	When the sponsorship deal is confirmed and payment is received, the referral partner's commission is calculated automatically (based on the pre-set commission rate) and paid out via the Vouch Links platform or via IGE's payment infrastructure.

4.3 Referral Partner Account — Features

- Referral Partner registration and profile (LinkedIn required, professional background, sector expertise)
- Full read-access to the IGE event marketplace all approved event listings visible
- 'Refer This Event' button on every approved event listing page generates unique Vouch Links referral link
- Referral Dashboard: all generated links, click counts, sponsor referrals submitted, deal status, commission earned and pending
- Real-time notifications: when a referred sponsor submits a Commitment Form, when a referred deal progresses, when commission is confirmed
- Commission calculator: partner can see estimated earnings before referring (based on tier price and commission rate)
- Payout history and invoicing: downloadable records for accounting purposes
- IGE Partner Badge on profile: displayed publicly, signals credibility within the IGE network

4.4 Who Can Become a Referral Partner

Referral Partner accounts are open to any professional who meets the eligibility criteria below. This is deliberately inclusive; the goal is to build a large, active referral network quickly.

- Partnerships Managers and Directors
- Brand Marketing Managers and CMOs
- Brand Managers at agencies or corporates
- Account Managers at media and sponsorship agencies
- Business Development professionals
- Event consultants and event producers with sponsor relationships
- PR and communications professionals with brand relationships

- Senior professionals in banking, fintech, FMCG, and telecoms with access to marketing budgets
- Diaspora professionals with access to international brand sponsors
- ABW Partnerships Circle members (automatic Referral Partner access as a membership benefit)

Referral partners do NOT need to be event experts. They need access to sponsor decision-makers and budget holders. IGE provides the event intelligence, the commercial structure, and the deal infrastructure. The partner provides the warm relationship and the introduction.

4.5 Commission Structure

Standard Commission Rate	5–10% of confirmed sponsorship deal value (configurable per event category and tier by ABW admin)
Premium Partner Rate	Up to 12% for Referral Partners who have closed 3+ deals on the platform (performance tier)
Commission Trigger	Commission is earned when: (a) referred sponsor submits Commitment Form AND (b) deal is confirmed and first payment is received
Commission Split	ABW earns its platform commission (10–15%) first. Referral partner commission is paid from the ABW take on the deal not an additional charge to the organiser.
Payout Method	Via Vouch Links platform (primary) or direct bank transfer (NGN, USD, GBP, EUR) — 30-day payment cycle
Dispute Resolution	ABW admin has final authority on commission attribution. Referral must be demonstrably linked to the deal via the tracked link or documented introduction.

4.6 Vouch Links Integration — Technical Requirements

DEVELOPER: The following integration requirements must be implemented in the MVP sprint. Vouch Links API documentation is available at vouchlinks.com.

- Vouch Links API integration for referral link generation authenticated per Referral Partner ID
- Link generation triggered from 'Refer This Event' CTA on event listing pages (visible only to logged-in Referral Partners)
- Attribution tracking: Vouch Links tracks clicks, link-sharing behaviour, and conversion events (Commitment Form submission)

- Webhook integration: Vouch Links fires a webhook to IGE when a conversion event (Commitment Form submission) is recorded IGE updates the deal card with referral partner attribution
- Commission calculation: IGE admin dashboard auto-calculates referral commission when deal status is moved to 'Payment Received'
- Partner Dashboard: referral link performance data pulled from Vouch Links API and displayed on IGE Referral Partner dashboard
- Payout initiation: triggered from IGE admin dashboard, processed via Vouch Links or direct payment infrastructure

05. CORE PLATFORM FEATURES

Web, mobile, and all user-facing product capabilities.

DEVELOPER NOTE: All features below apply to both the web platform and mobile app unless otherwise specified. Both must share a single backend API and data layer.

5.1 Authentication & User Profiles

- Social login: Google OAuth and LinkedIn OAuth (LinkedIn mandatory for Sponsors and Referral Partners credibility signal)
- Email + password with OTP verification
- Role-based onboarding: Organiser, Sponsor, Referral Partner, Media Partner, ABW Team
- Profile completeness score drives discoverability on the platform
- Organiser Profile: organisation name, logo, bio, website, past event history, portfolio of past sponsors, track record metrics, document uploads
- Sponsor Profile: brand name, industry, company size, HQ, sponsorship focus sectors, target geographies, audience types, budget range (private), past event sponsorships portfolio
- Referral Partner Profile: full name, professional title, LinkedIn URL, sector expertise, professional background, typical sponsor network description, referral history and commission record

5.2 Event Listings & Marketplace

Event Submission — 9-Step Form (Multi-step, auto-save on every step):

- Step 1: Event Basics — name, type (37-item dropdown), format, dates, city, country, venue, website
- Step 2: Organiser Details — name, role, email, phone, social, years running event, past editions

- Step 3: Audience Profile — attendance size, primary audience (multi-select), seniority, decision-makers present, geographic mix
- Step 4: Sector and Theme — primary sector, secondary sector, event theme
- Step 5: Sponsorship Information — tier names, prices, assets, slot counts, exclusivity, custom options, minimum spend
- Step 6: Brand & Media Value — exposure channels, speaking opps, lead capture, media partners, post-event reports
- Step 7: Document Uploads — sponsorship deck PDF, banner image, floor plan (optional)
- Step 8: Commercial Terms — deadline, payment terms, ABW management request
- Step 9: Consent and Vetting Approval

Vetting Workflow (ABW Internal):

- Status states: Submitted → Under Review → Revision Requested → Approved → Listed → Closed → Archived
- Approved events receive the 'IGE Vetted' badge
- Organiser notified at each stage via email + in-app push notification

Event Listing Page (Sponsor-Facing) — This is a sales page. Design it like one:

- Hero: full-width banner, event name, type badge, date + city, sticky primary CTA: 'Sponsor This Event'
- Quick Facts Strip: sector, audience size, decision-makers present badge, starting price, slots remaining
- About the Event, Audience Insight, Sponsorship Tier Cards, Brand Exposure Checklist
- Trust Signals: organiser profile, past sponsor logos, IGE Vetted badge, sponsor testimonials
- Downloads: sponsorship deck PDF, event brochure
- Actions: 'Sponsor This Event', 'Request Custom Package', 'Book Call with IGE'
- NEW: 'Refer This Event' button — visible to logged-in Referral Partners only. Generates Vouch Links referral link.

Marketplace Browse & Search:

- Filter panel: event type, sector, country, city, budget range, audience size, format, date range, decision-makers present, IGE Vetted toggle
- Keyword search, sort options, card view and list view toggle, map view (Mapbox)
- Save / Watchlist for sponsors, event comparison tool (up to 3 events)

5.3 Sponsorship Deal Flow & Transactions

Commitment / Intent Form (The Gatekeeper — most commercially critical form on the platform):

- Section 1: Readiness Confirmation — mandatory checkbox of serious commercial intent

- Section 2: Professional Identity — Name, Title, Company, LinkedIn URL (required), Brand Region
- Section 3: Partnership Commitment — currency, type (Cash/In-Kind/Co-Creation/JV), budget range
- Section 4: Strategic Alignment — expected ROI, proposed start date
- Section 5: Event-specific — tier selection, custom requirements
- Referral attribution: if sponsor arrived via a Vouch Links referral link, referral partner ID is captured automatically and embedded in the deal record

Deal Pipeline (ABW Internal — Kanban):

- Stages: Inquiry Received → Qualification Call Scheduled → Proposal Sent → Negotiation → Contract Signed → Payment Received → Deal Closed
- Each deal card shows: referral partner name (if applicable), commission amount due to partner, ABW commission
- Commission calculator: auto-computes ABW's earn AND referral partner's earn based on configured percentages
- Revenue dashboard: total deal value, closed deals by month, ABW commissions, referral partner commissions paid

Contracts & Payments:

- Digitally generated sponsorship agreement (template-driven PDF, e-signed via DocuSign or Yousign)
- Payment processing: Stripe (USD, GBP, EUR) and Paystack (NGN) — both integrated from MVP
- Automatic commission split on payment receipt: ABW commission + referral partner commission calculated and logged

5.4 Sponsor Intelligence Engine

- Event intelligence profiles: data profile built over time — actual attendance, sponsor outcomes, audience demographics, ROI benchmarks
- Organiser credibility score: track record, vetting history, deal completion rate, sponsor feedback
- AI-powered sponsor-event matching: logged-in sponsors with completed profiles receive ranked 'Recommended Events'
- Match score displayed with explanation (e.g. '87% match — fintech audience, Lagos, Q3, within budget')
- Weekly email digest: 'New events matching your profile this week'
- Competitor tracking: sponsor can flag competitor brands and receive alerts when those brands sponsor events

5.5 Documentary & Media Content Layer

- Each listed event can have a Media Profile section: embedded video, photo gallery, past event highlight reel
- IGE-produced documentary content tagged to event profiles
- Documentary production can be commissioned as a paid add-on service by organisers
- Content syndicated to IGE YouTube, Instagram, and LinkedIn
- Media inquiry form: journalists and content producers can request access or press credentials

5.6 User Dashboards

Organiser Dashboard:

- My Events: submitted, pending, live, and past events with status
- Sponsorship Pipeline: all active sponsor inquiries per event — status, value, sponsor name, referral attribution
- Analytics: event profile views, inquiry volume, save count, conversion rate, deal value closed
- Documents: upload and manage event decks, contracts, post-event reports

Sponsor Dashboard:

- Discover: recommended events, new listings matching profile, saved events, referral partner-shared events
- My Deals: all active and past sponsorship commitments — status, event, value, next steps
- Budget Tracker: total committed sponsorship budget across events, by currency

Referral Partner Dashboard (NEW):

- Marketplace Access: full browse and search of all approved events
- My Referrals: all generated referral links, click counts, conversions, deal status
- Commission Tracker: earned commissions (confirmed), pending commissions (deal in progress), paid out
- Payout History: downloadable records by event, by date range
- Notifications: sponsor submitted Commitment Form via my link, deal moved to next stage, commission confirmed

ABW Admin Dashboard:

- Event Queue: vetting pipeline, status, assigned lead

- Deal Pipeline: full CRM view across all organiser-sponsor relationships with referral attribution
- Referral Partner Management: all registered partners, their active links, conversion rates, commissions owed
- Revenue Dashboard: GMV, ABW commissions, referral partner commissions, pipeline forecast
- Commission Configuration: set ABW %, set referral partner % per deal type or event category

06. PROFESSIONALS MARKETPLACE

Africa's event talent infrastructure — built into IGE.

Beyond connecting organisers with sponsors, IGE becomes the place where every professional who makes an event possible can be discovered, hired, and reviewed. The Professionals Marketplace transforms IGE from a sponsorship platform into the full operating system for the African events industry.

6.1 Strategic Rationale

- An organiser who can find their sponsors AND their entire delivery team in one platform has almost no reason to go anywhere else — driving deep retention and organiser lifetime value.
- Network effect: professionals join because organisers are there. Organisers stay because professionals are there. Sponsors follow because quality events are produced there.
- Data compounding: every professional engagement adds to the platform's intelligence — which professionals deliver quality, which events attract which talent tier, which cities have supply gaps.
- Barrier to exit: once an organiser has event history, sponsor deals, professional team, and reviews all inside IGE — leaving is enormously costly.
- Africa-first: no equivalent platform exists in Africa or diaspora markets.

6.2 Professional Profile

- Full name, professional title, profile photo, primary category, subcategory/specialisation
- Years of experience, location (city + country), travel availability, regions available
- Languages spoken — critical for Nigeria-France corridor and francophone Africa
- Work preference: Freelance / Contract / Full-time / Open to all
- Availability calendar, day rate / project rate (NGN, USD, GBP, EUR)
- LinkedIn URL (required), portfolio (image gallery, video showreel, PDF credentials)

- Past event credits: events worked, role, organiser name, year — organiser-verified where possible
- IGE Verified badge (awarded after ABW profile review)
- Organiser reviews and ratings (collected after each verified engagement)

6.3 27-Category Professional Taxonomy

Every professional selects one primary category and one or more subcategories from the following 27 categories:

#	Category	Example Roles
1	Event Strategy & Management	Event Director, Producer, Event Manager, Coordinator, Logistics Coordinator
2	Sponsorship & Partnerships	Sponsorship Manager, Partnerships Director, Brand Activation Manager, Commercial Director
3	Marketing, Communications & PR	Event Marketing Manager, Digital Marketing, Social Media Manager, PR Manager, Copywriter
4	Stage, Production & Technical Direction	Technical Director, Stage Manager, Show Caller, Production Assistant, Teleprompter Operator
5	Audio & Sound	A1/A2 Audio Engineer, Sound Effects Engineer, Live Recording Engineer, Wireless Mic Technician
6	Lighting & Visual Environment	Lighting Designer, Followspot Operator, LED Wall Technician, Atmospheric Effects Technician
7	Video, Screens & Projection	Video Director, Camera Operator, Live Stream Tech, Drone Operator, IMAG Operator
8	Photography & Visual Documentation	Event Photographer, Portrait Photographer, 360-Degree Photographer, Documentary Photographer
9	Stage Design, Set & Scenic Construction	Set Designer, Stage Builder, Set Decorator, Props Manager, Scenic Painter, Custom Fabricator
10	Exhibition & Booth Design / Build	Exhibition Stand Designer, Booth Builder, Exhibition Graphics Specialist, Interactive Exhibit Designer
11	Venue Decor, Styling & Floral	Event Stylist, Floral Designer, Table Linen Stylist, Balloon Artist, Cultural Decor Specialist
12	Graphic Design & Visual Identity	Graphic Designer, Brand Designer, Motion Graphics Designer, Signage and Wayfinding Designer
13	Floor Plan, Spatial & Experience Design	Floor Plan Designer, Spatial Experience Designer, Traffic Flow Analyst, Seating Plan Specialist
14	MC, Hosts & Presenters	MC / Host, Conference Moderator, Panel Facilitator, Bilingual MC, Virtual/Hybrid Event Host

15	Speakers, Facilitators & Trainers	Keynote Speaker, Workshop Facilitator, Motivational Speaker, Fireside Chat Host
16	Audience Engagement & Experience	Audience Engagement Specialist, Gamification Designer, Networking Facilitator, Registration Lead
17	Food, Beverage & Catering	Catering Manager, Executive Chef, Cocktail Specialist, African Cuisine Specialist, Bar Manager
18	Hospitality, Accommodation & Travel	Hospitality Manager, VIP Concierge, Hotel Coordinator, Speaker Logistics Manager, Delegate Liaison
19	Security, Safety & Emergency Management	Security Director, Close Protection Officer, Crowd Management Specialist, First Aid Officer
20	Staffing, Ushering & Event Crew	Event Staff Coordinator, Usher, Registration Officer, Brand Ambassador, Promotional Staff
21	Technology, Digital & Event Tech	Event Tech Consultant, Event App Builder, Ticketing Specialist, Hybrid Platform Manager, RFID Tech
22	Documentary, Media Production & Content	Documentary Director, Field Producer, BTS Content Creator, Podcast Producer, Live Social Media Host
23	Translation, Interpretation & Language	Simultaneous Interpreter, Conference Interpreter, Sign Language Interpreter, Subtitling Specialist
24	Legal, Compliance & Regulatory	Event Lawyer, Contract Specialist, NDPR/GDPR Compliance Officer, Licensing Officer
25	Finance, Accounting & Procurement	Event Finance Manager, Budget Analyst, Procurement Specialist, Sponsorship Revenue Accountant
26	Sustainability & CSR	Sustainability Officer, Zero-Waste Event Planner, Carbon Footprint Analyst, CSR Programme Coordinator
27	Wellness, Entertainment & Talent	Entertainment Director, DJ, Comedian, Cultural Performer, Award Trophy Designer, Team-Building Facilitator

6.4 Discovery, Job Board & AI Team Builder

- Browse and Search: filter by category, subcategory, city, country, availability, language, rate range, IGE Verified status
- Map view: professionals plotted by location — essential for organisers planning events in new cities
- Job Board: organisers post specific roles; professionals apply with profile + pitch; organiser reviews and sends contract offer in-platform
- Shortlisting: save professionals to named shortlists, compare up to 5 in same category side-by-side
- AI Team Builder (Phase 1): organiser describes event type/scale/location/budget; platform auto-generates recommended team list with suggested professionals per category

6.5 Contracting, Payments & Reviews

- In-platform contract generation from template: role, event, deliverables, rate, payment schedule, cancellation terms
- Digital e-signature via DocuSign or Yousign integration
- Payment via Stripe / Paystack — platform holds escrow until event delivery confirmed (solves non-payment problem in Nigerian market)
- Milestone payments: deposit on booking, balance on event completion
- Review system: organiser leaves star rating and written review after each verified engagement; professionals respond publicly
- Reviews are verified — only organisers who contracted via IGE can leave reviews

07. BUSINESS MODEL & REVENUE ARCHITECTURE

How IGE makes money. Multiple surfaces on every transaction.

Revenue Stream	Model	Detail
Sponsorship Commission (Primary)	% of deal value	ABW earns 10–15% of sponsorship value on all deals facilitated through IGE. Referral partner commission is paid from this take — not charged additionally to the organiser.
Referral Partner Commission	Included in above split	Referral partners earn 5–10% of confirmed deal value, paid from ABW's commission. Top-performing partners unlock up to 12%.
Organiser Retainer	Monthly retainer	Organisers who want ABW to actively manage sponsorship outreach pay NGN 150k–500k / \$100–\$400/month.
Platform Listing Fee	Per-event or annual	Basic listing free at launch to drive supply. Premium listings (featured placement, analytics, matchmaking priority) are paid.
Sponsor Intelligence Subscription	Monthly SaaS	Brands pay for premium access: full audience reports, AI matching, competitor tracking, market intelligence.
Professionals Marketplace Fee	% of contract value	IGE earns 8–12% on all professional service contracts transacted through the platform.
Professional Premium Subscription	Monthly / Annual SaaS	Professionals pay for priority listing, featured profile, AI Team Builder inclusion, advanced analytics.

ABW Private Circle Integration	Monthly / Annual	Circle members get exclusive deal flow, Referral Partner access, and private sponsorship briefings.
Documentary Production	Project fee	Organisers commission IGE to produce event documentary or highlight content.
White-Label Platform (Future)	Annual SaaS license	License IGE platform infrastructure to other partnership organisations, events bodies, or governments. Series A+ play.

Year 1 Revenue Targets (Investor Narrative)

Events Listed (Year 1)	50–100 vetted events
Deals Facilitated	20–40 closed sponsorship deals
Avg ABW Commission per Deal	10% of deal value
Referral Partner Deals	5–15 deals attributed to referral partners
Platform Subscription Revenue	20–50 brand subscribers at \$20–\$200/month
Organiser Retainers	5–10 active retainers at \$150–\$400/month
Target Year 1 Platform Revenue	\$120,000–\$400,000 USD

08. SPRINT BUILD PLAN

What gets built, when, and in what order. This is how we ship.

DEVELOPER NOTE: Build in 2-week sprints. Sprint demos shared with ABW team after every sprint via Loom or live call. No feature is built outside the agreed sprint scope without a written change order. This plan is the contract.

Sprint Overview — Full Roadmap

Feature	Sprint / Phase	Priority
Landing page + brand story + how it works + CTAs	Sprint 1 (MVP)	P0 — Critical
Organiser + Sponsor + Referral Partner registration and onboarding	Sprint 1 (MVP)	P0 — Critical
Event submission form (all 9 steps, auto-save)	Sprint 2 (MVP)	P0 — Critical
ABW admin dashboard: vetting queue, user management	Sprint 2 (MVP)	P0 — Critical
Approved event listing page (full layout — hero, tiers, actions)	Sprint 3 (MVP)	P0 — Critical
Marketplace browse + filter (type, sector, country, format, date)	Sprint 3 (MVP)	P0 — Critical
Commitment / Intent Form (sponsor gatekeeper form)	Sprint 3 (MVP)	P0 — Critical
Vouch Links API integration referral link generation	Sprint 4 (MVP)	P0 — Critical
'Refer This Event' CTA on listing pages (Referral Partner only)	Sprint 4 (MVP)	P0 — Critical
Referral Partner Dashboard (links, clicks, conversions, commission tracker)	Sprint 4 (MVP)	P0 — Critical
Vouch Links webhook — attribution capture on Commitment Form submission	Sprint 4 (MVP)	P0 — Critical
In-platform messaging (organiser ↔ ABW, sponsor ↔ ABW)	Sprint 5 (MVP)	P1 — High
Email notifications (status updates, inquiries, messages)	Sprint 5 (MVP)	P1 — High
Stripe + Paystack payment integration (basic — payment link generation)	Sprint 5 (MVP)	P1 — High

Commission calculator in ABW admin (ABW % + referral partner %)	Sprint 5 (MVP)	P1 — High
ABW revenue dashboard: deal values, commissions, pipeline summary	Sprint 6 (MVP)	P1 — High
Mobile app: event discovery, sponsor commitment form, push notifications	Sprint 6 (MVP)	P1 — High
Production hosting, SSL, domain, DB, storage, NDPR/GDPR compliance	Sprint 1–6 (MVP)	P0 — Infrastructure
AI-powered sponsor-event matching engine	Phase 1	P1 — High
Organiser analytics dashboard (views, inquiries, conversions)	Phase 1	P1 — High
Sponsor analytics + budget tracker dashboard	Phase 1	P1 — High
In-platform contract generation (template PDF)	Phase 1	P1 — High
E-signature integration (DocuSign or Yousign)	Phase 1	P1 — High
Installment payment plans	Phase 1	P2 — Medium
Event comparison tool (up to 3 events side-by-side)	Phase 1	P2 — Medium
Map view for event discovery (Mapbox)	Phase 1	P2 — Medium
Professionals Marketplace: profiles, directory, basic search	Phase 1	P1 — High
Job Board: organiser posts, professional applications, contracts	Phase 1	P1 — High
Escrow payments for professional contracts	Phase 1	P1 — High
Organiser credibility scores and track record badges	Phase 1	P2 — Medium
Competitor tracking alerts for sponsors	Phase 1	P2 — Medium
ABW Private Circle integration: exclusive deal flow section	Phase 1	P2 — Medium
Full mobile app feature parity with web	Phase 1	P1 — High
Documentary and media content section: video embeds, galleries	Phase 2	P2 — Medium
Quarterly African Event Sponsorship Intelligence Report	Phase 2	P2 — Medium
Sponsor intelligence SaaS subscription tier	Phase 2	P2 — Medium
AI Team Builder for professionals	Phase 2	P2 — Medium
Multi-language support: English and French	Phase 2	P2 — Medium

API for third-party integrations (Salesforce, HubSpot)	Phase 2	P3 — Low
White-label architecture groundwork	Phase 2	P3 — Low
Investor data room: automated data exports for due diligence	Phase 2	P2 — Medium

Sprint Detail — MVP (Sprints 1–6, Weeks 1–12)

Sprint 1

Weeks 1–2

Goal: Foundation — Brand, Auth, and User Onboarding Live

- Landing page: brand story, how it works, 3 user CTAs (Organiser, Sponsor, Referral Partner)
- Authentication system: Google + LinkedIn OAuth, email/password + OTP
- Role-based onboarding wizard: Organiser, Sponsor, Referral Partner, Admin
- Basic profile builder for all three user types
- Production hosting configured: Vercel (frontend) + Railway/Render (backend)
- PostgreSQL database provisioned and secured. SSL + domain configured.
- Privacy policy, cookie consent, NDPR compliance banner live

Sprint 2

Weeks 3–4

Goal: Events In — Submission Form and Vetting Queue Live

- 9-step event submission form (multi-step, auto-save after every step)
- AWS S3 / Cloudflare R2 storage for PDF uploads and images
- ABW admin dashboard: event vetting queue (Kanban view), user list
- Vetting status workflow: Submitted → Under Review → Revision Requested → Approved
- Email notifications: organiser notified at each vetting stage
- Staging environment live and accessible to ABW team for QA

Sprint 3

Weeks 5–6

Goal: Events Out — Marketplace and Listing Pages Live

- Approved event listing page (full layout: hero, quick facts, about, audience insight, tier cards, trust signals, downloads, actions)
- Marketplace browse page: event cards with filter panel (type, sector, country, format, date range)
- Keyword search across events
- Sponsor Commitment / Intent Form (5-section gatekeeper form)
- Form submission triggers: email to organiser + task created in ABW CRM
- Referral attribution field embedded in Commitment Form (populated from URL param)

Sprint 4

Weeks 7–8

Goal: Referral Engine — Vouch Links Integration Live

- Vouch Links API integration: authenticated per Referral Partner ID
- 'Refer This Event' CTA on all event listing pages (visible to Referral Partners only)
- One-click referral link generation via Vouch Links API — unique per partner + event
- Vouch Links webhook integration: fires to IGE when Commitment Form submitted via referral link
- Referral attribution auto-captured and linked to deal record on ABW deal pipeline
- Referral Partner Dashboard: generated links, click counts, conversions, deal status, commission tracker
- Commission calculator: estimated earnings displayed before referral is sent

Sprint 5

Weeks 9–10

Goal: Transactions — Payments and Communications Live

- In-platform messaging: organiser ↔ ABW team, sponsor ↔ ABW team
- Email notification system: new inquiries, messages, deal updates, payment reminders
- Stripe integration: payment link generation (USD, GBP, EUR)
- Paystack integration: payment link generation (NGN)
- Exchange rate API: real-time currency conversion display
- Commission calculator in ABW admin: auto-computes ABW % AND referral partner % on deal confirmation
- Calendly / Cal.com integration: 'Book a Call with IGE' on event pages

Sprint 6

Weeks 11–12

Goal: Dashboard, Mobile MVP, and Go-Live

- ABW admin revenue dashboard: total deal value in pipeline, closed deals by month, ABW commissions, referral partner commissions
- Organiser dashboard: My Events, Sponsorship Pipeline with referral attribution, Notifications
- Sponsor dashboard: Discover, My Deals, Notifications
- Mobile app (React Native / Expo): event discovery and search, sponsor commitment form, push notifications, login/profile
- Cross-browser and mobile QA testing across all critical flows
- Lighthouse performance audit — target >85 on all key pages
- End-to-end testing: organiser submission → vetting → listing → sponsor inquiry → referral attribution
- Platform launch — IGE goes live

09. TECHNICAL ARCHITECTURE & STACK

How the platform is built. What it runs on.

DEVELOPER NOTE: These are architecture requirements. Any deviation must be documented and approved by ABW before implementation. Do not substitute tools without written consent.

9.1 Recommended Technology Stack

Layer	Recommended Technology	Rationale
Frontend (Web)	Next.js 14+ (React) with TypeScript	SEO-critical for marketplace discovery. App Router for performance. Server components for fast page loads.
Mobile App	React Native (Expo) iOS & Android	Shared codebase with web. Faster time-to-market. Strong ecosystem for African developers.
Backend / API	Node.js + Express or NestJS (TypeScript)	Strong ecosystem. Compatible with Stripe and Paystack SDKs. Easy to scale.
Database	PostgreSQL (primary) + Redis (caching/sessions)	Relational integrity critical for deal pipelines. Redis for fast session and search cache.
Search	Algolia or Meilisearch	Fast, filterable marketplace search. Excellent Nigerian/African latency via CDN.
File Storage	AWS S3 or Cloudflare R2	PDF decks, images, video thumbnails. R2 preferred for cost efficiency.
Authentication	NextAuth.js / Auth0 with LinkedIn OAuth	LinkedIn login is a requirement for sponsor and referral partner credibility.
Payments	Stripe (international) + Paystack (NGN)	Both integrated from Day 1. Multi-currency display via exchange rate API.
Referral Engine	Vouch Links API (vouchlinks.com)	Handles referral link generation, click tracking, and conversion attribution for the Referral Partner network.
Email	Resend or Postmark	Transactional emails — deal alerts, notifications, referral confirmations. Better deliverability than SendGrid.
CRM / Deal Pipeline	Custom-built in platform	Platform-native CRM ensures data ownership and intelligence layer integrity.

AI / Matching	OpenAI API (GPT-4o) or Anthropic API	Powers sponsor-event matching, profile scoring, and intelligence summaries. Phase 1.
Analytics (Internal)	Mixpanel or PostHog (open-source)	User behaviour tracking. PostHog preferred for data sovereignty.
Hosting	Vercel (frontend) + Railway or Render (backend)	Fast global CDN. West Africa latency acceptable. AWS Lagos region as upgrade path.
Maps	Mapbox GL JS	Map view for event discovery. Better Africa data than Google Maps at lower cost.
Contracts / e-Sign	DocuSign API or Yousign (EU-compliant)	Yousign preferred for GDPR compliance on EU/France corridor deals.

9.2 Architecture Principles

- **API-First Design:** backend built as a clean REST (or GraphQL) API from Day 1. Web and mobile both consume the same API. No duplication of business logic.
- **Multi-Tenancy Ready:** architecture supports white-labeling in the future enabling ABW to offer the IGE platform as infrastructure to other partnership organisations.
- **Data Ownership First:** all event data, audience profiles, deal histories, referral attribution, and intelligence data stored in ABW-owned infrastructure. No critical data locked in third-party tools.
- **Performance for African Networks:** image compression, lazy loading, PWA capabilities, offline-friendly mobile caching. A meaningful portion of users will access mobile networks in Nigeria and West Africa.
- **Security & Compliance:** NDPR compliance mandatory. GDPR compliance required for European operations (France corridor). All deal and payment data encrypted at rest and in transit. RBAC for all admin functions.

SECTION 10

UX, DESIGN & BRAND REQUIREMENTS

How IGE looks, feels, and communicates.

IGE PRD v2.0 — AlexBoyo World — May 2026

The IGE Brand Mark — Official Logo Suite

The four images below represent the official IGE logo suite as approved. These are the source of truth for all colour values, gradient directions, and logomark treatment in this section.

DESIGNER & DEVELOPER NOTE: The colour palette in this section is extracted directly from the actual IGE logos above. These values override any previously assumed palette. Use only these values in all UI, components, and assets.

10.1 THE IGE COLOUR SYSTEM

Extracted from the official logo. These are the only approved values.

Primary Brand Gradient — The IGE Signature

The IGE brand is defined by a gradient that moves from purple (#6B3FA0) on the left to emerald green (#0E8A62) on the right. This gradient is the soul of the brand — it appears in the logomark, the app icon, UI primary actions, headers, and all brand communications. It is not optional and not interchangeable.

Gradient Direction	Left → Right (or top-left → bottom-right for backgrounds)
Start Colour	#6B3FA0 — IGE Purple (the 'i')
End Colour	#0E8A62 — IGE Emerald (the 'e')
Midpoint Approx	#3A6AA0 — blue-teal at the centre of the gradient
CSS	background: linear-gradient(135deg, #6B3FA0 0%, #3A6AA0 50%, #0E8A62 100%)
Usage	Logo, app icon, primary CTA buttons, section headers, gradient backgrounds, premium feature indicators

Full Colour Palette

Swatch	Name / Hex	Role	Where It Lives
	IGE Purple #6B3FA0	PRIMARY BRAND	Logo 'i', primary CTAs, links, active states, section headers, badges, primary buttons
	Deep Purple #59358A	PRIMARY DARK	Gradient anchor (dark bg), footer, deep shadows, nav background, mobile header
	Circle Purple #804B97	PRIMARY MID	Avatar backgrounds, secondary buttons, hover states on cards
	IGE Emerald #0E8A62	SECONDARY BRAND	Logo 'e', success states, confirmation banners, verified badges, green highlights, links on dark bg
	Deep Emerald #027C59	SECONDARY DARK	Gradient anchor (dark bg), pressed states on green CTAs, footer accent
	Near Black #1A1028	DARK BACKGROUND	Page backgrounds (dark mode), overlay panels, modal backdrops
	Charcoal #2D1F3D	BODY TEXT	Body text (primary), card text, heading text on white
	Mid Gray #7A6A8A	SECONDARY TEXT	Secondary text, meta info, timestamps, labels, placeholder text

	Off White #F8F5FC	LIGHT BACKGROUND	Page background (light mode), card backgrounds, form fields
	Light Purple #EFE7F7	LIGHT ACCENT	Table row alternates, hover states on white, subtle chips
	Light Emerald #E5F5EE	LIGHT ACCENT	Success notification backgrounds, confirmed deal banners, verified state fills
	Pure White #FFFFFF	WHITE	Logo on gradient, text on dark backgrounds, card surfaces

Colour Usage Rules

- NEVER use the IGE Purple and IGE Emerald as flat fills on the same page without the gradient — use the gradient instead.
- NEVER use any colours outside this palette in the platform UI without ABW written approval.
- The gradient must always run purple-to-green (never reversed). Diagonal or horizontal directions only.
- On white backgrounds: use IGE Purple (#6B3FA0) for primary interactive elements (buttons, links, active states).
- On dark/gradient backgrounds: use white text and IGE Emerald (#0E8A62) for highlights.
- Success / confirmed / verified states: IGE Emerald (#0E8A62) and Light Emerald (#E5F5EE).
- Error states: use a standard red (#C0392B) — this is the one colour outside the IGE palette permitted in UI.
- Sponsor, Organiser, and Referral Partner dashboards can have colour-coded accents — but always drawn from the approved palette, never external colours.

10.2 TYPOGRAPHY

Typeface, scale, and hierarchy.

Primary Typeface	Inter (Google Fonts) — preferred. Fallback: Neue Haas Grotesk, Helvetica Neue, Arial. No decorative, serif, or display fonts.
Heading Weight	Bold (700) for H1–H3. Semi-bold (600) for H4–H5.
Body Weight	Regular (400) for body text. Medium (500) for labels and UI copy.
Heading Colour	#2D1F3D (Charcoal) on white. White on purple/gradient/dark.
Body Text Colour	#2D1F3D (Charcoal) on white. White on dark backgrounds.
Link Colour	#6B3FA0 (IGE Purple) on white. #C4ADDF (light purple) on dark.

H1 (Page Title)	Inter Bold, 40–48px / 2.5–3rem. Used for primary page headings.
H2 (Section Title)	Inter Bold, 28–32px / 1.75–2rem.
H3 (Sub-section)	Inter Semi-Bold, 22–24px / 1.375–1.5rem.
Body	Inter Regular, 16px / 1rem. Line height 1.6.
Small / Meta	Inter Regular, 13–14px / 0.875rem. Colour: #7A6A8A.
Buttons / CTAs	Inter Bold, 15–16px. All caps or sentence case — never mixed.
Character Spacing	Slight tracking (+20) on uppercase labels and section headings for authority.
NO DECORATIVE FONTS	Under no circumstances. Not for event names, not for 'Africa vibes', not for anything. Inter only.

10.3 LOGO USAGE GUIDE

When to use which version of the mark.

Gradient Wordmark(White bg)	Primary use: website header (desktop + mobile), email headers, documents, presentations, proposals, sponsorship decks. The default logo.
White on Gradient(App Icon)	Use for: mobile app icon (iOS + Android), browser favicon, social media profile photos (@insideglobalevents), dark-background contexts, video thumbnails, speaker badges.
Circle + Full Name(Horizontal Lockup)	Use for: co-branding situations (e.g. 'In partnership with IGE'), formal documents, partner-facing materials, printed collateral, letterheads.
Stamp / Circular Badge	Use for: the 'IGE Vetted' event badge, the 'IGE Verified' professional badge, watermarks on exported reports, certificate-style assets, merch/apparel.
Minimum Size	Wordmark: never below 120px wide (digital) or 30mm wide (print). Circle lockup: never below 40px diameter.
Clear Space	Always maintain minimum clear space of the height of the lowercase 'i' dot on all four sides of any logo version.
NEVER	Stretch, distort, rotate, recolour, add shadows, outline, or place on a background that conflicts with the logo. The gradient always runs purple-to-green — never reverse it.

10.4 DESIGN LANGUAGE & VISUAL SYSTEM

How the platform feels to use.

IGE must feel global, executive, and credible — not like a Nigerian startup side project. The design communicates that this is infrastructure-grade. Every visual decision should pass this test: does this look like it belongs on the same page as Bloomberg, Notion, or a high-end African creative agency? If not, redesign.

Design Principles

Principle 1: Authority First	Every page communicates that IGE is serious commercial infrastructure. No playful illustrations on the main marketplace. No cheap stock photography. No generic SaaS design patterns.
Principle 2: Data is Beautiful	Audience intelligence, deal values, commission tracking — all numbers and data should be presented with clarity and visual confidence. Inspired by financial dashboards, not social media.
Principle 3: Africa + Global	The imagery and content proudly centres Black and African professionals while communicating global positioning. Lagos and Paris in the same visual language. Not a 'local' product.
Principle 4: Gradient = Premium	The IGE gradient (purple → green) is reserved for premium moments: hero sections, primary CTAs, achievement states, featured listings, and verified badges. Do not dilute it by using it everywhere.
Principle 5: White Space Sells	Let the content breathe. Event listings are sales pages — generous padding and clear hierarchy outperform cluttered information dumps every time.
Principle 6: Mobile is Primary	Over 60% of African users will access IGE on mobile. Every component is designed mobile-first and tested on a 375px viewport before desktop.

UI Components & Patterns

Primary Button	Background: IGE Gradient. Text: White, Inter Bold. Rounded corners: 8px. Hover: darken gradient 8%. No border.
Secondary Button	Background: White. Border: 2px solid #6B3FA0. Text: #6B3FA0, Inter Bold. Hover: fill Light Purple (#EFE7F7).
CTA — 'Sponsor This Event'	Gradient background, white text, full-width on mobile, sticky on scroll. This is the most important button on the platform.
CTA — 'Refer This Event'	IGE Emerald (#0E8A62) background, white text. Visible only to logged-in Referral Partners. Sits below the Sponsor CTA.
Event Cards	White card, subtle shadow (0 4px 16px rgba(107,63,160,0.08)), rounded 12px. Purple gradient left-border accent (4px). IGE Vetted badge in top-right corner.

Verified / Vetted Badges	IGE Emerald (#0E8A62) background, white text and checkmark. Circular stamp form using the badge logo variant.
Navigation	White background (light mode) or Deep Purple (#59358A) (dark mode). Active state: IGE Purple underline or fill.
Form Fields	White background, border #7A6A8A at rest, border #6B3FA0 (IGE Purple) on focus. Label: Charcoal, Inter Medium.
Tables / Lists	Alternating Light Purple (#EFE7F7) and White rows. Header row: Deep Purple (#59358A) with white text.
Success / Confirmed States	IGE Emerald (#0E8A62) icon, Light Emerald (#E5F5EE) background banner. E.g. 'Deal Confirmed', 'Commission Earned'.
Progress Indicators (Forms)	Gradient progress bar (purple → green) showing % completion of multi-step forms.

10.5 IMAGERY & PHOTOGRAPHY DIRECTION

What goes in the photos and how to shoot it.

Who is in the imagery	Black professionals — founders, CMOs, marketing directors, partnerships leads, event organisers. Not performers. Not attendees. Decision-makers.
Settings	Large-scale events: conference stages, exhibition halls, gala tables, branded spaces. Global cities: Lagos, Paris, London, Nairobi, Dubai. High-production environments.
Aesthetic	Warm lighting, real candid-style moments from real events. Not stock photo smiles. Editorial quality — think Bloomberg Businessweek or Monocle magazine.
Colour grading	Slightly cooler tones to harmonise with the purple-to-green brand palette. Avoid heavy warm orange filters.
What to avoid	Generic stock photography. White hands only. Americana imagery. Cheap event photography (blurry, under-lit, badly composed). Clip art. Illustrations on the main marketplace (save for onboarding empty states only).
Event Listing Hero Images	Supplied by event organisers. Minimum: 1920x1080px, high quality. ABW team reviews image quality at vetting stage — substandard images are requested for replacement before listing goes live.
Illustrations	Used only in: onboarding flows, empty states, error pages, and loading states. Style: geometric, minimal, using the IGE gradient palette. Never on commercial pages.

10.6 DESIGN DELIVERABLES

What the designer must produce. In this order.

Deliverable 1	Design System in Figma: colour tokens, typography scale, button variants, form components, card components, badges, navigation, modal, empty states. All using the IGE palette extracted from the logos above.
Deliverable 2	Wireframes: all key pages and flows for web and mobile — approved by ABW before moving to high-fidelity.
Deliverable 3	High-fidelity Figma designs: Landing Page, Marketplace, Event Listing Page, Organiser Dashboard, Sponsor Dashboard, Referral Partner Dashboard, ABW Admin Dashboard, Commitment Form, Submission Form.
Deliverable 4	Responsive breakpoints for every screen: mobile (375px), tablet (768px), desktop (1280px+). Mobile designs delivered first.
Deliverable 5	Referral Partner Flow: onboarding, marketplace browse, 'Refer This Event' link generation UI, share modal (WhatsApp, LinkedIn, email shortcuts), commission tracker dashboard, milestone confirmation states.
Deliverable 6	Dark mode designs for all key screens (optional at MVP, required at Phase 1). Deep Purple (#59358A) and Near Black (#1A1028) as base backgrounds.
Deliverable 7	Micro-interactions spec: hover states, button presses, form focus states, loading states, success/error animations. Subtle. Not gratuitous.
Deliverable 8	Accessibility audit: WCAG 2.1 AA minimum. Colour contrast checked against all foreground/background combinations in the palette.

10.7 CRITICAL UX PRINCIPLES

The rules that govern every interaction on the platform.

Conversion-Optimised Event Pages	Every event listing page is a sales page. 'Sponsor This Event' (gradient button) must be visible at all scroll depths — sticky CTA on mobile. 'Refer This Event' (emerald button) equally prominent for Referral Partners. Trust signals (IGE Vetted badge, organiser profile, past sponsor logos) must be above the fold on desktop.
Progressive Disclosure for Forms	Multi-step forms (submission, commitment) must show a clear progress indicator styled with the IGE gradient. Each step must be auto-saved — organisers must never lose data on browser close or accidental navigation.

Mobile-FirstMarketplace	All browse, filter, event card, commitment form, and referral link generation flows designed and tested on 375px mobile viewport before desktop. Thumb-zone navigation. Bottom sheets for filters.
Empty States& Onboarding	Every empty state must be encouraging and action-driving, not just a blank screen. Use minimal IGE gradient illustrations. 'No referrals yet — here's how to make your first one' with a CTA, not a blank dashboard.
ReferralConfirmation UX	When a Referral Partner generates a referral link: (1) the link is displayed large and copyable with a one-tap copy button; (2) sharing shortcuts appear immediately — WhatsApp, LinkedIn, Email — styled with their brand colours; (3) estimated commission is shown ('If this deal closes, you could earn ₦450,000 / \$300'); (4) a confirmation micro-animation plays using the IGE emerald colour.
CommissionMilestone States	When a Referral Partner earns commission: a celebratory but professional notification appears — IGE Emerald highlight, clear amount, event name, and a 'View Payout Details' CTA. Not a confetti explosion. Satisfying and credible.
Vetting &Approval States	Organisers must always know exactly where their event is in the vetting process. A visual timeline indicator styled with the IGE gradient shows current status. Each stage change triggers an in-app notification and email.
NoFriction Browsing	Sponsors and Referral Partners can browse the full event marketplace without being logged in. Registration is only required when taking action (submitting interest, generating a referral link). Reduce barriers to initial engagement.

10.8 BRAND VOICE & COPY STANDARDS

How IGE speaks. Every word on the platform reflects this.

Tone	Confident. Direct. Executive. Outcomes-focused. IGE does not hedge. It does not over-explain. It does not use startup filler language.
Primary Audience	CMOs. Marketing Directors. Founders. Partnership Leads. These are busy, smart people who need information fast.
NEVER say	'Exciting opportunity', 'Amazing', 'We are passionate about...', 'Leverage synergies', 'Game-changer', 'Disrupting the industry'. These are weak words.
ALWAYS say	Specific outcomes. Real numbers. Clear value. 'Close your sponsorship budget in 6 weeks, not 6 months.' 'Access 100+ vetted events looking for your brand right now.' 'Earn commission when the deal closes. Not before.'

Event Listing Copy	Written in the voice of what the sponsor gains — not what the organiser wants. 'Your brand in front of 1,200 fintech decision-makers in Lagos.' Not: 'We are proud to present...'
Referral Partner Copy	Performance-oriented. 'Know someone with a marketing budget? Refer them to this event. If they sponsor, you earn up to ₦500,000.' Clear, direct, compelling.
Error Messages	Human and helpful, never technical. 'Oops, that didn't work — try again or contact support.' Not: 'Error 500: Internal Server Error'.
Empty States	Encouraging and actionable. 'No events saved yet — browse the marketplace and save events you want to sponsor.' Not: 'No items found'.

This is what IGE looks like.

Every pixel, every word, every interaction builds the brand or erodes it.

Build it like the infrastructure it is.

11. INTEGRATIONS & THIRD-PARTY REQUIREMENTS

Every external tool the platform connects to.

Integration	Purpose	Sprint / Phase
Stripe	International payment processing (USD, GBP, EUR)	Sprint 5 (MVP)
Paystack	Nigerian Naira payment processing	Sprint 5 (MVP)
Vouch Links API	Referral link generation, click tracking, conversion attribution, partner commission management	Sprint 4 (MVP)
LinkedIn OAuth	Sponsor + Referral Partner login and credibility verification	Sprint 1 (MVP)
Google OAuth	General user authentication	Sprint 1 (MVP)
Resend / Postmark	Transactional email delivery	Sprint 5 (MVP)
AWS S3 / Cloudflare R2	Document and image storage	Sprint 2 (MVP)
Exchange Rate API	Real-time currency conversion display	Sprint 5 (MVP)
Calendly or Cal.com	Book a call with ABW team on event pages	Sprint 5 (MVP)
Mixpanel / PostHog	User behaviour analytics — tracks referral link activity, conversion funnels	Sprint 1 (MVP)
Mapbox GL JS	Map view for event discovery	Phase 1
Algolia / Meilisearch	Fast marketplace search and filtering	Phase 1
DocuSign or Yousign	Digital contract e-signature	Phase 1
OpenAI / Anthropic API	AI matching engine, profile scoring, intelligence summaries	Phase 1
YouTube / Vimeo embed	Documentary and event video content	Phase 1
Salesforce / HubSpot API	Enterprise brand sponsor CRM integration	Phase 2

12. NON-FUNCTIONAL REQUIREMENTS

Performance, security, reliability, and scalability targets.

Marketplace page load	< 2.5 seconds on a 4G connection in Lagos
Event listing page load	< 2 seconds (images lazy-loaded)
Search results response	< 500ms
API response time	< 300ms for 95% of requests under normal load
Uptime SLA	99.5% minimum
MVP user capacity	10,000 registered users, 1,000 concurrent sessions without degradation
Phase 2 scale	100,000+ events, 500,000+ users supported
Database backups	Daily, retained for 30 days
Error monitoring	Sentry or equivalent — alerts to ABW team for critical errors
Password security	bcrypt hashing, minimum cost factor 12
API authentication	JWT with short-lived access tokens + refresh tokens
RBAC	Organiser, Sponsor, Referral Partner, Media, ABW Admin, Super Admin
Payment data	Never stored on IGE servers — tokenised via Stripe/Paystack
NDPR compliance	Privacy policy, data processing agreement, right to erasure
GDPR compliance	Required for European users (France corridor)
Referral attribution data	Retained for minimum 12 months for dispute resolution

13. DELIVERY, COMMUNICATION & HANDOVER

How we work together. What accountability looks like.

Development Process

- Agile delivery: 2-week sprints, sprint demos shared with ABW team via Loom or live call after every sprint
- Project management: Linear, Jira, or Notion — agreed at kickoff, accessible to ABW team at all times
- Git repository: GitHub or GitLab — ABW team must have owner access at all times. No single developer retains sole ownership of any code.
- Staging environment: always current with latest code, accessible to ABW for QA at any time
- Weekly written status update: what was completed, what is in progress, blockers, next sprint plan
- No scope changes without a written change order signed by both parties

Testing Requirements

- Unit tests for all critical business logic: deal calculations, commission splits, referral attribution, payment flows
- Integration tests for all third-party integrations: Stripe, Paystack, Vouch Links, e-signature, LinkedIn OAuth
- End-to-end tests for critical flows: organiser submission → vetting → listing; sponsor commitment → deal creation → payment; referral partner → referral link → sponsor conversion → commission attribution
- Cross-browser testing: Chrome, Safari, Firefox (desktop); Chrome and Safari (mobile)
- Performance testing: Lighthouse score > 85 on all key pages

Handover Requirements

- Full codebase in ABW-owned repository — no developer retains sole code ownership
- Technical documentation: architecture overview, database schema, API docs (Swagger/OpenAPI), environment setup guide
- Admin guide: how ABW team manages events, deals, users, referral partners, and commissions without developer intervention
- Deployment runbook: step-by-step guide for deploying updates and managing infrastructure

- 30-day post-launch support period included in engagement

14. SUCCESS METRICS & INVESTOR KPIs

How we measure. Analytics infrastructure must capture all of these from Day 1.

Metric	Definition	Target — End of Year 1
Events Listed	Total approved events on platform	100+
Organiser Signups	Registered organiser accounts	500+
Sponsor Signups	Registered sponsor / brand accounts	200+
Referral Partner Signups	Registered Referral Partner accounts	150+
Referral Links Generated	Unique Vouch Links referral links created	300+
Referral-Attributed Inquiries	Commitment Forms submitted via referral link	40+
Referral-Attributed Deals Closed	Confirmed deals with referral partner attribution	15+
Sponsor Inquiries (Total)	Commitment Forms submitted (all channels)	100+
Deals Closed (Total)	Contracts signed and payment received	30+
Gross Merchandise Value (GMV)	Total sponsorship value transacted via platform	\$500,000+
ABW Revenue (Commission)	ABW's earned commission from closed deals	\$60,000+
Referral Partner Commission Paid	Total commissions paid to referral partners	\$15,000+
Platform Subscription Revenue	Monthly/annual subscriptions from sponsors	\$24,000+
Avg Event Page Views	Views per listed event	500+ per event
Organiser NPS	Net Promoter Score from organiser survey	>50
Sponsor NPS	Net Promoter Score from sponsor survey	>50

Referral Partner NPS	Net Promoter Score from referral partner survey	>55
Mobile App Downloads	iOS + Android combined	2,000+
Time-to-First-Deal	Days from event listing to first sponsor inquiry	<30 days avg

15. EVENT TYPE TAXONOMY

The 37 official event types used across all form dropdowns, filters, and data models.

DEVELOPER: This list is the single source of truth. Use it consistently across all form dropdowns, search filters, and database enums. Do not abbreviate, modify, or add to this list without written approval from ABW.

#	Event Type	#	Event Type
1	Conference	20	Award Ceremony
2	Summit	21	Gala Night
3	Trade Mission	22	Workshop
4	Business Forum	23	Masterclass
5	Industry Expo	24	Training Programme
6	Exhibition	25	Bootcamp
7	Product Launch	26	Retreat
8	Brand Activation Event	27	Roadshow
9	Corporate Networking Mixer	28	Pop-up Event
10	Executive Roundtable	29	University or Campus Event
11	Private Dinner	30	CSR or Impact Event
12	Investor Demo Day	31	Government or Policy Event
13	Startup Pitch Event	32	Diaspora Event
14	Founder Meetup	33	Market Entry Event
15	Community Meetup	34	Launch Tour
16	Cultural Festival	35	Hybrid Event
17	Music or Entertainment Event	36	Virtual Event
18	Fashion Event	37	Webinar Series

16. DOCUMENT SIGN-OFF

Agreement before build begins.

This Product Requirements Document represents the agreed scope, vision, and commercial model for the I.G.E platform build. Any deviation from this document requires written approval from AlexBoyo World before implementation begins. This document supersedes all previous versions.
